What You'll Gain

This self-paced eLearn intends to define and instruct all supporters of any education level on the top five conditions linked to preventable deaths of people with I/DD. Awareness of the Fatal Five Fundamentals is critical for providing adequate support and appropriately targeting treatment needs.

Learners will feel empowered to observe, make informed decisions, and take action.

- How to spot the Fatal Five & how to report them
- Real-world scenarios and how to handle them
- Over **200** interactive questions to ensure the learner's knowledge
- Access downloadable info sheets related to the Bristol stool chart, detecting hydration, handwashing techniques, and more!

How it Works

The Fatal Five Fundamentals eLearn course is accessible 24/7 and hosted on IntellectAbility's Learning Management System (LMS). Learners move through the course at their own pace while it saves all forward progress. IntellectAbility's LMS tracks user access and completion and will issue certificates of completion if an overseeing agency requires it.

What is Aspiration?

- Foods or fluids going below the vocal cords into the airway is aspiration
- Some people do not cough and that is called silent aspiration
- Chronic micro aspiration where only very small amounts of saliva, fluids or food goes into the airway
