

The fundamentals of IDD healthcare every clinician should know.

For clinicians, by a clinician.

Curriculum in IDD Healthcare eLearn

Duration: 4.5 hrs **5 CME / 6 CEU Credit Hours**

This online course was created and delivered by Dr. Craig Escudé, FAAFP, FAADM for physicians and other clinicians to serve as a comprehensive IDD training curriculum.

It delivers pertinent, practical information that can be put to use immediately in your practices to improve outcomes for those with an intellectual development disorder and/or intellectual disability characteristics.

- > Unlock the language of behavior and how it can point to specific underlying medical causes
- > Improve communication between clinicians and supports of people with IDD to facilitate better healthcare
- > Learn from real-life case studies
