

Actions Speak Louder Than Words eLearn Course

1 Module

40 min.

Great for: Any and all supporters of people with intellectual and developmental disabilities

Recognize behaviors associated with:

- Head Pain
- GI Distress
- Pneumonia
- Dental Issues
- Bowel Issues
- Seizures
- UTI
- Chest Pain
- Sexual Abuse
- And More!

What You'll Gain

This self-paced eLearn intends to define and instruct all supporters on the behavioral presentations of common medical conditions in people with I/DD. Awareness of these conditions and how someone with I/DD may communicate discomfort, illness, or pain, with or without using words, is critical for providing adequate support and appropriately targeting treatment needs.

Learners will feel empowered to observe, make informed decisions, and take action.

- How to spot changes in baseline behavior that may indicate pain, illness, or an underlying issue
- Real-world scenarios presented in case study format
- Interactive questions to ensure the learner's knowledge

How it Works

The Actions Speak Louder than Words eLearn course is accessible 24/7 and hosted on IntellectAbility's Learning Management System (LMS)*. Learners move through the course at their own pace while it saves all forward progress. IntellectAbility's LMS tracks user access and completion and will issue certificates of completion if an overseeing agency requires it.

*All of IntellectAbility's eLearn courses are also available to be hosted on an agency's existing SCORM-compliant LMS if desired.
