

The HRST helps detect early signs of health instability, empowering supporters to prevent avoidable suffering and death.

HIPAA-compliant, validated, and used nationwide to replace risk with health and wellness.

130,000+ people monitored

2,000+ provider agencies

26 states using the HRST

WHAT IS THE HRST?

Exclusive to IntellectAbility

Validated & Reliable:
Backed by peer-reviewed research

Web-Based & Accessible 24/7:
Real-time data sharing

User-Friendly:
Designed for all levels of support staff

Interoperable:
Customize and integrate with other systems

HOW IT WORKS

Screening:

22-item scale identifies health risks with Yes or No questions

Action:

Generates Service & Training Considerations

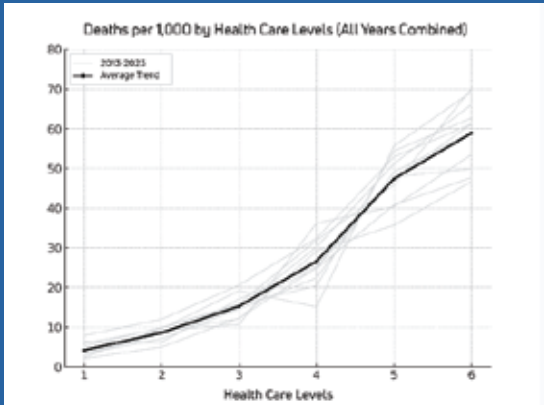

Scoring:

HRST assigns a Health Care Level (HCL) 1-6

Outcome:

Improved planning, early intervention, reduced risk

PROVEN IMPACT

Research shows a direct link between Health Care Levels and mortality. A 1-point increase in HCL signals a higher health risk. Early intervention saves lives.

WHO BENEFITS

People with IDD
Identifies overlooked health risks, supports well-being

IDD Providers
Guides training, care planning, and risk response

Managed Care Organizations
Enables risk stratification and resource allocation

State IDD/Medicaid Agencies
Valid data for reporting, waiver prioritization, and HCBS performance measures

PERSON-CENTERED APPROACH

The HRST identifies true, person-centered health risks and supports CMS 1915(c) and 1915(i) person-centered planning requirements.

It bridges data and compassion, balancing health and welfare for a well-lived life.

OUTCOMES & INTEGRATION

- Supported by telemedicine
- Informs mortality reporting & HCBS metrics
- Strengthens training & staffing
- Helps states optimize Medicaid spending
