## What You'll Gain

This self-paced elearn course includes the bulk of information from the Fatal Five Fundamentals course with added direction on how to use this information as a Case Manager. The message is, **"Just because you are not a clinician does not mean you cannot clinically advocate for someone."** All quizzes and scenarios are geared toward helping a Case Manager understand how they can use this information to increase the health and safety of those they support.

- Real-world scenarios and how to handle them
- Over **200** interactive questions to ensure the learner's knowledge
- Access downloadable info sheets related to the Bristol stool chart, detecting dehydration, handwashing techniques, and more!

Oversee and advocate to prevent the Fatal Five.

## How it Works

This eLearning course can be hosted within an existing SCORM-compliant Learning Management System or through IntellectAbility's electronic Learning Platform (eLP). Both options allow learners to progress at their own pace while enabling tracking of user activity and course completion, with certificates generated upon successful completion.

## How Do I Prevent GERD?

- About 50% of food is out of the stomach within 2.5-3 hours
- The stomach takes 4-6 hours to completely empty
- Don't lie down for 2.5-3 hours after eating
- If one must lie down, lift up the head of the bed 20-30 degrees
